Kyrgyz-Russian Slavic University

Information Technologies Software

Skilled web developer with more than 3 years in developing Web applications with HTML5, CSS3, JavaScript, React, Redux, Node.js, Next.js, and other latest front-end web development technologies. I enjoy collaborating with others to build useful and beautiful web experiences. I'm attentive to detail and have an eye for good UX.

Last Projects

- Portfolio for Photographer – multipage website with responsive, mobile-first design. The photo gallery presents the works of the photographer. Technologies used: Astro framework, Tailwind CSS
- Catalog of Bakery products – web application for saving all products in different kinds of categories, quick searching, and ordering the products. Technologies used: Astro framework, React + TanStack Query, Node.js (express), MongoDB, Tailwind CSS

WORK EXPERIENCES

FREELANCE   Jan 2022 – Dec 2023 (2 years)

Self-employed Web developer & UI/UX designer

- Collaborated with clients of small businesses to create the concept of web application or landing page (mock-up, wire-frame);
- Introduced clients to cutting-edge graphic design solutions that increased page hits, new customer acquisition and retention, and sales;
- Developed user-friendly web pages with a responsive, cross-browser, mobile-first approach;
- Implemented best design practices to ensure consistent user experience on any device;
- Optimized web applications for speed and scalability with page load times less than ~2 seconds; Deployed web applications.

Using technology: HTML5, CSS3, SASS, JavaScript, jQuery, Astro, React, MongoDB, FireBase, Node.js (express), Tailwind CSS, Bootstrap, Material UI, GitHub, Figma

ALLOE NETECH AGAVA   Feb 2008 – Jul 2009 (1.5 years)

Front End Software Engineer

A Digital Agency with a mission to help small to medium enterprise websites generate more leads, sales, and revenue.

- Translated UI wireframes and mockups to visual elements of the application;
- Performed the duty of fixing the technical issues related to the designing and programming;
- Improved client's websites with responsive features to support multiple devices for different browsers;
- Successfully optimized client websites for speed and SEO which improved page rank by ~75%.

Using technology: HTML, CSS, JavaScript, Template Toolkit, Photoshop, Subversion

WORKS-FOR-WEB   Aug 2006 – Jan 2008 (2 years)

Web developer

Start-up creative agency with a mission to develop a platform for small and medium online businesses based on their own customized CMS in different classified areas. I've worked on projects such as Listing applications for realtors and the Automobile online market.

- Added new functionality and features to commercial client websites;
- Fixed bugs and memory leaks with periodic code reviews;
- Refactored source code down to 35% of its original size for an entire application.

Using technology: PHP, HTML, CSS, JavaScript, XML, MySQL, Selenium, jMeter
